Continuation Sheet (PTO-303)

Continuation of 3. NOTE: wherein the sending computing device and the recipient computing device can establish trust without consulting a third computing device.

Continuation of 11. does NOT place the application in condition for allowance because: Applicant argues that the preamble for claim 1 should be given patentable weight and cites MPEP 2111.02 (II) for support. This argument is not persuasive because the relied upon section of MPEP 2111.02 (II) specifically recites, "If the body of a claim fully and intrinsically sets forth all of the limitations of the claimed invention, and the preamble merely states, for example, the purpose or intended use of the invention, rather than any distinct definition of any of the claimed invention's limitations, then the preamble is not considered a limitation and is of no significance to claim construction. Pitney Bowes, Inc. v. Hewlett-Packard Co., 182 F.3d 1298, 1305, 51 USPQ2d 1161, 1165 (Fed. Cir. 1999)." In the instant case, a network of non-trusting computing devices, as recited in the preambe, is an intended use of the invention.
